

NOVOSENSE Products Applied in Solar Inverter

- Isolated Driver (NSi6801C/NSi6601) :
High CMTI, low propagation delay and small part-to-part skew
- Non-Isolated Driver (NSD1025/NSD1624) :
Strong driving ability, strong anti-interference ability and cost-effective
- Hall Current Sensor (NSi201x)/Isolated Amplifier (NSi13xx) :
Small package, high voltage and high sensibility
- Isolated Interface (NSi8308x/NSi1050) :
High integration and good EMC performance

- Digital Isolator (Superwide Body NSi82xx) :
Superwide creepage, strong anti-interference and high withstand voltage
- Voltage Reference (NSREF30/31xx) :
High initial accuracy and low temperature drift
- High/Low Voltage Operational Amplifier (NSOPA8xxx/NSOPA9xxx) :
Low offset, low noise and high precision
- Flyback Controller (NSR2845/NSR28Qxx) :
Low startup power consumption, light load and high efficiency, low EMI

NOVOSENSE
